

MILILANI HIGH SCHOOL FIRST ROBOTICS

A SCIENCE LEARNING CENTER PROGRAM

MCDONALD'S ROBOTICS WEEK

During the week of March 21st-27th, Friends of Hawaii Robotics is allowing teams to participate in the McDonald's Robotics Demonstrations from 7:00am to 9:00am. For every Egg McMuffin Sandwich and Egg McMuffin Extra Value Meal purchased during the promotional period, \$1 will be donated to Friends of Hawaii Robotics. The donation will be evenly distributed to each of the FIRST teams in the state. Go out and buy your Egg McMuffins!

FINAL LOGO!

The logo has been chosen! With the name Mililani Hot Spot, or MHS, the idea of lava, and wifi came to many people's thoughts. The Wifi signal at the top of the M of the final logo, stays true to our representation of Hot Spot. The M does not only represent M for Mililani, but it also represents Oahu's mountain ranges (the Waianae range and the Koolau range). The wifi is a representation of Mililani because we are located in between the two mountain ranges. Also the wifi represents our connection with technology and also brings together the two "mountains" and brings unity. We also choose our final logo for its simplicity and its ability to be recognized from a far. Having the team number in the logo also helps others to recognize us easier.

One of the first logo designs.

The team logo after voting and adjustments.

Another adjustment to the logo to improve the design.

The final team logo.

BUILD SEASON COMING TO A CLOSE

During crunch time, we finalized our projects and made sure that everything is as good as it can be. On the last day of build season, we had an open house that some of our parents attended. The parents were hosted by the Electrical leads, and our project manager/Mechanical lead. They received a recap of this past build season, including a summary of the weekly videos, followed by the game animation. Events such as our fundraisers, and fall camp were presented, as well as the Competition which will be coming up soon, and relay for life, which you can sign up for online. Along with the events that have passed, or will be coming up; we also presented the robot design, before seeing the team test the robot. As build season ended, most of the stress is relieved, but there is still work to be done.
