

# FIRST ROBOTICS MILILANI HIGH SCHOOL TROBOBOTS

## HAWAII STEM CONFERENCE

This year, five members from our team were able to participate in the Hawaii STEM Conference sponsored by Women in Technology. It was held at the beautiful Wailea Beach Marriott Resort & Spa in Maui, so we packed our bags and hopped on the plane. Teachers, parents, community members and business leaders were invited to gather from across the state to celebrate Science, Technology, Engineering, and Math. With over 300 students in attendance, the conference began with a fun science presentation, icebreakers, and a 5x5 session. In the 5x5 session we were able to talk to industry professionals who were able to give us good insight on different careers in the STEM field. It was very interesting to see the paths that each person had taken to get to the position that they are in now.

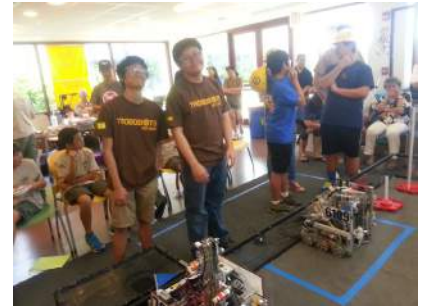

Over the two day conference, we were able to engage in breakout session taught by the industry professionals. We engaged in 3D CAD, Photoshop, Augmented Reality, Design Thinking, Cybersecurity, Web Design, Game Design, Videography, GIS/GPS, Leadership, Science/Adaptive Optics, Green Technologies, and many more. Along with meeting some really great people, it was a really good experience to see the support that we have going into the STEM field. Thank you to Women in Technology for organizing this amazing event and we hope to attend again next year. Thank you also to Mrs. Lavarias who chaperoned us on this trip.

# HAWAII FTC SCRIMMAGE

As a part of an eagle scout project for a student in the Punabots (Team 6109), the Hawaii FTC Teams gathered again at Gates Learning Center at Punahou Schools to play another tournament of the 2014 Cascade Effect game. Seven teams came to compete. Both our FTC teams did well; Tau (Team 7438) placed 4th and Omicron (Team 7851) was selected by Team 6109 and won the top alliance.
