

Igniting Inspiration

October 10-14, 2016

8:30 AM-11:30 AM

fall STEM enrichment camps for grades 3-5

held at Mililani High School

hosted by Mililani Hot Spot Robotics

sponsored by the MHS Science Learning Center

Camp Selections

Science Explorations	LEGO Robotics	Intro to Programming	Robot Arm
Activities will explore different fields of science such as anatomy, chemistry, and geology.	An introductory robotics course, where participants will use LEGO kits to create a robot that completes missions set by the 2014 FIRST LEGO League Game.	Students will learn the basics of programming and mathematical logic with projects built in Scratch and code.org.	This camp will feature the OWI Robotic Arm Edge to control and program the arm to complete objectives. This camp has more basic concepts compared to LEGO Robotics.
			

\$125 Tuition

Sign up **now!** Limited space in each camp.

Registration runs from **September 10** to **September 17, 2016**
